

modulo

Efficient storage for small vans

An efficient solution

Space saving efficiency

Bott modulo has been designed to maximise the use of space within your van, giving the efficiency of a traditional van racking setup without over-restricting general load space.

Fully crash tested

The system has been successfully crash tested at the Motor Industry Research Association (MIRA). The test was performed to EU ECE / R17 standards using a half sine wave 24g ECE17 acceleration pulse, simulating a 30mph frontal impact.

Integrated high quality floor

Modulo installations can be fitted with the new Bott Group flooring system, made of responsibly sourced plywood with a tough, impact resistant, wipe clean surface, helping keep your van clean and tidy, and protecting it from unwanted abrasion.

Flexible options to suit your needs

Bott modulo configurations enable you to have a solution tailored to your needs, with different shelf sizes and innovative removable storage options, so you can be sure to find a solution to fit your requirements.

Fast and simple fitting

The system has been developed for simple home fitting; no drilling required. Many configurations can be fitted in around 60 minutes.

Easy and simple to choose

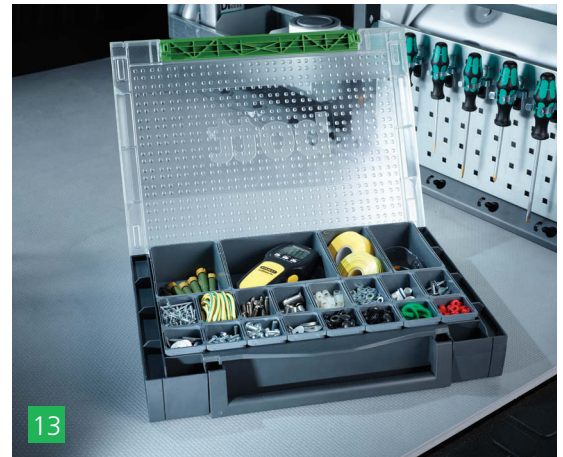

With our new online vehicle configurator you can quickly build your ideal modulo van racking solution, adding accessories as required.

Online ordering & fast delivery

Once configured, modulo can be ordered online, and we aim to get most orders to customers within seven working days.

Black & Decker
In 3 easy steps

Cellulose
Thinners

Directions for use:
1. Mix the contents of the can with a small amount of water to form a paste.
2. Apply the paste to the surface to be treated with a brush or roller.
3. Allow the paste to dry for 24 hours before use.
4. For best results, use the product in a well-ventilated area.
5. Do not use on surfaces that are already painted or stained.
6. Do not use on surfaces that are made of wood, metal or plastic.
7. Do not use on surfaces that are made of stone or concrete.
8. Do not use on surfaces that are made of brick or masonry.
9. Do not use on surfaces that are made of glass or ceramic.
10. Do not use on surfaces that are made of leather or fabric.

Flooring

HIGH QUALITY FLOORING

The new Bott Group flooring system is made of responsibly sourced plywood with a tough, impact resistant, wipe clean surface, helping keep your van clean and tidy, and protecting it from unwanted abrasion.

Our van floors also include a vehicle-specific stainless steel side door trim panel and fitting kit. The modulo solution is designed to make the most of all available space in the van, covering the exposed sides of the van, so side linings are not needed.
